## **DETAILED ACTION**

## Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1-3 are rejected under 35 U.S.C. 102(b) as being anticipated by Amaro et al (5,883,797).

Amaro et al discloses a power device, comprising at least a first and a second DC-DC converter (30), with each converter having respective input (Vs) and output voltages (Vd) and respective input and output currents, each converter converting an input DC-voltage level to an output DC-voltage level, with each converter also comprising input means (42) for a control signal, a single control circuit common to the first and second converters (32) and arranged to detect a first output voltage at a point in the device which is a common point for the output voltages of the first and second converter (Vd), with the control circuit being arranged to deliver a common control signal to control input terminal of each converter, said common control signal being varied according to a level of voltage at said common point; wherein the control signal to each converter is arranged to control the output current of the respective converter; wherein the voltage at said common point is kept essentially constant by controlling the output currents of the converters to be essentially equal (since each of the power converters 30 is under a common control, the voltage Vd at the destination is maintained equally by all of the power converters 30,

resulting in substantially equal current flow through each of the power converters 30). See Fig. 3.

## Response to Arguments

3. Applicant's arguments have been considered but are moot in view of the new ground(s) of rejection.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Y. J. Han whose telephone number is 571-272-2078. The examiner can normally be reached on Mon-Fri 6:30am-3:00pm.
